

Dive Deep Into Rolex History...  
And Back!

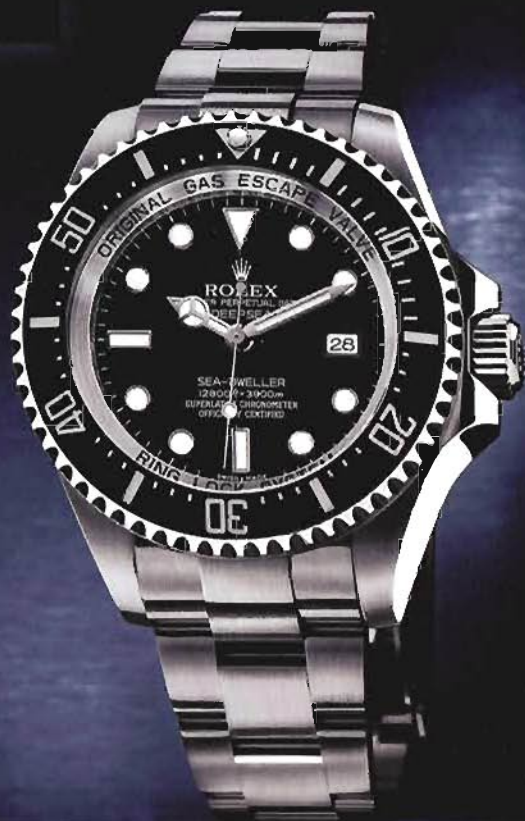

PRESENTED BY  
FOURTANÉ

  
ROLEX

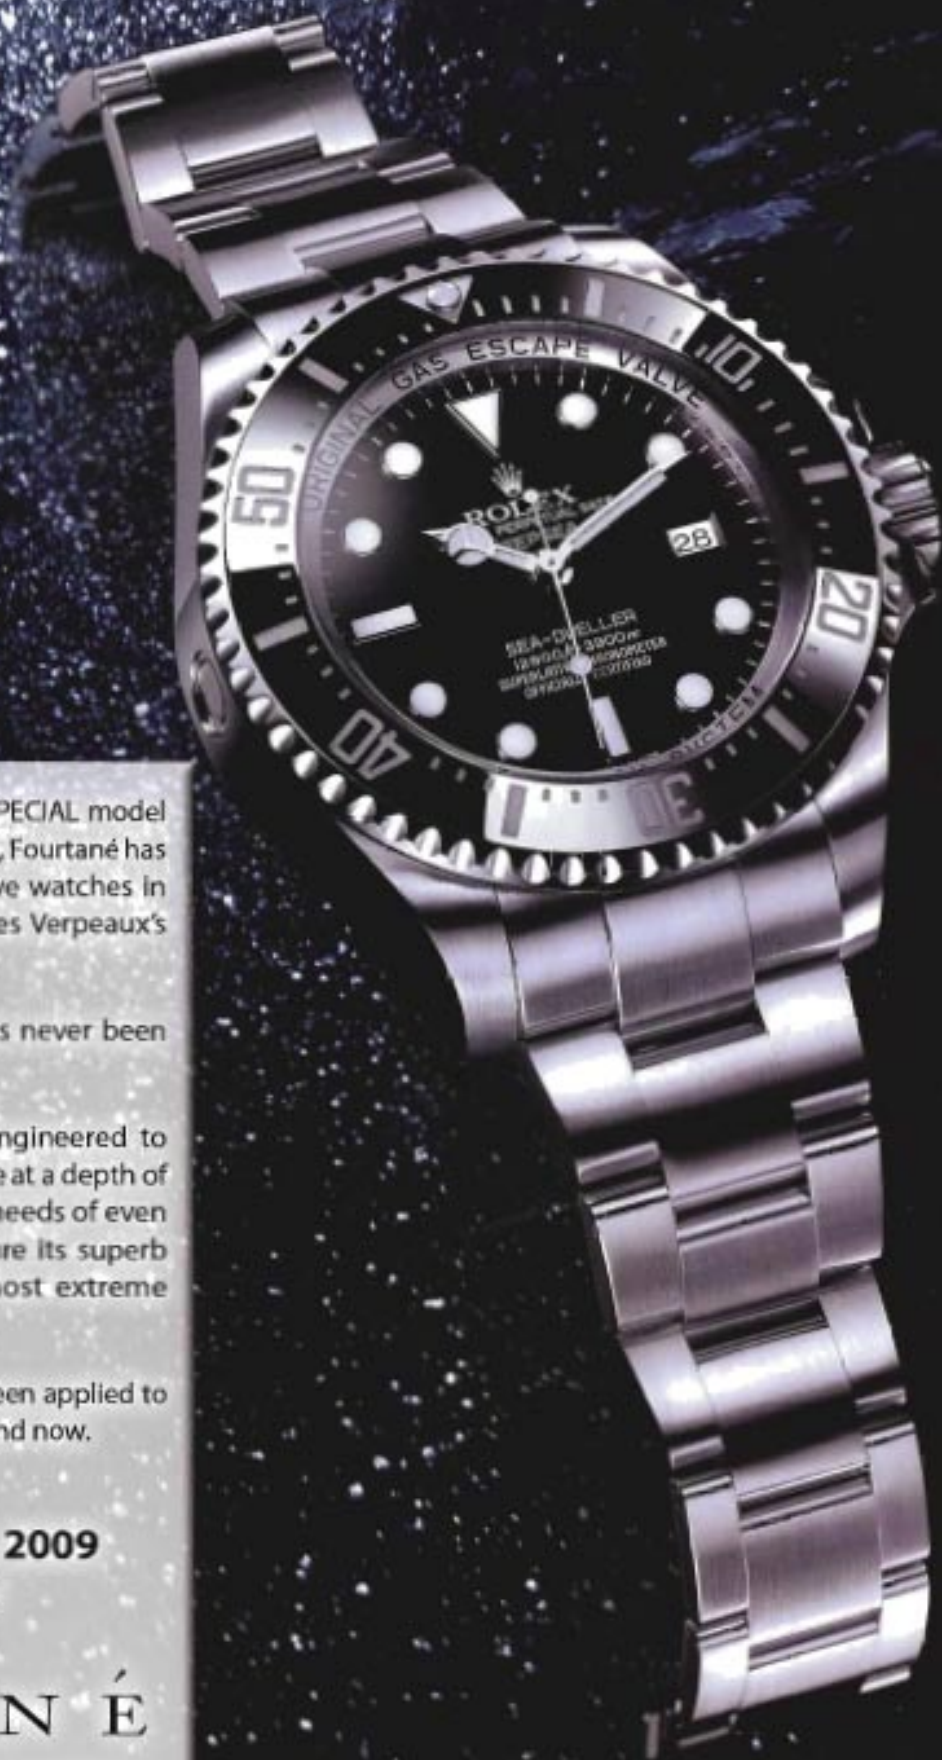

THE ORIGINAL DEEP-SEA-SPECIAL

Rolex takes pride in its watchmaking history. In 1960 the Rolex DEEP SEA SPECIAL reached a record depth of 35,810 ft. while fixed to the outside of the Trieste Bathyscaphe in the Mariana Trench in the Pacific Ocean. It's known as the deepest point on Earth and this feat has never been equaled. Captain Jacques Picard reported, "...even at 11,000 meters your watch is as precise as on the surface."

Fourtané is proud to present this DEEP SEA SPECIAL model on loan from Rolex for the first time. In addition, Fourtané has acquired four of the most coveted Rolex dive watches in history, including Partick Roude and Jacques Verpeaux's JANUS IV COMEX SEA-DWELLERS.

This historic Rolex dive watch collection has never been presented to the public before.

Today's Rolex Sea-Dweller Deepsea was engineered to exacting standards and superior performance at a depth of 3,900 m. (12,800 ft.). It's built to exceed the needs of even most professional divers, so you can be sure its superb quality and durability can endure the most extreme conditions you'll encounter.

As always, the lessons of Rolex history have been applied to produce the world's finest timepieces...then and now.
