Rumour is confirmed! May be the first one in Hong Kong!

My brand new Rolex 16710 GMT-II (red-hand) is equipped with the 3186 cal. Please see the photos below. Sorry for this lengthy and English message as I am poor in typing in Chinese.

I bought this 888 "Hong" watch from one of the Rolex's AD in Hong Kong around summer 2007. It had just been checked and verified by the Hong Kong RSC last week.

As far as I have searched in the Internet, so far, there are at least 5 more in US, 1 in Finland, 1 in Germany, 1 in Taiwan and 2 in Japan. Some experts commented that this (16710/3186) should be related to the last batch of discontinued GMT 16710 with the serial number from Z9xxxxx to M2xxxxx. Most of them were shipped to Europe and US, with very very limited to Asia and Hong Kong. It is time to check your GMT 16710. Hope that you can find another and rare piece very soon.
